Rio-Oso-Gem

(U. S. Plant Patent No. 89)

At Last a SELF-POLLENIZING, FREESTONE PEACH With All the Good Points

**FIRST IN
SIZE — FLAVOR — BEAUTY — FIRMNESS**

It is the largest peach of them all, averaging $2\frac{3}{4}$ to $3\frac{3}{4}$ inches across. Globular shaped. Almost free from fuzz.

Oh! What a flavor! Rich—sweet—juicy—slightly spicy.

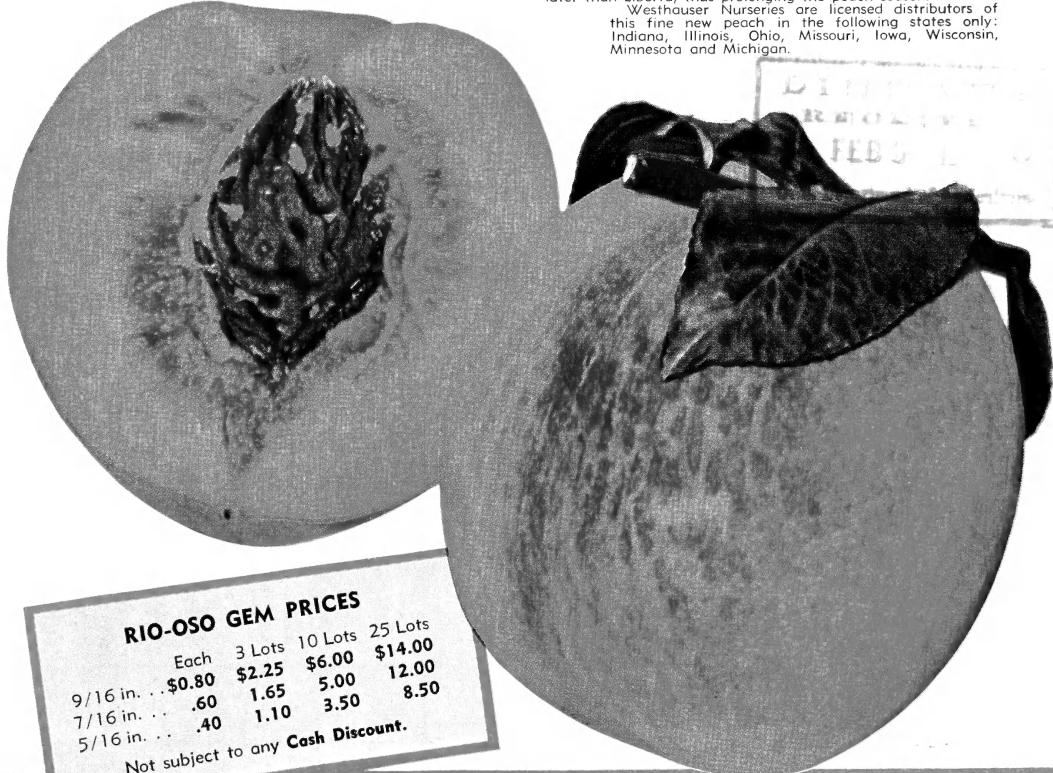

It's a beauty with its dashing, brilliant red blush, and its fine grained yellow flesh, that is red at the pit.

Tree bears young and is regularly productive, requiring annual thinning. It is very hardy. Rio Oso Gem has been grown here

in Michigan for the past few years, and will succeed wherever peaches are grown. One commercial grower is so enthused with Rio-Oso-Gem that he contemplates setting 60 acres of this wonderful variety.

It brings top prices. Buyers are instantly attracted by its size, beauty, and firmness of skin and flesh which makes it an excellent shipper. Then, too, it ripens a week to 10 days later than Elberta, thus prolonging the peach season.

Westhauser Nurseries are licensed distributors of this fine new peach in the following states only: Indiana, Illinois, Ohio, Missouri, Iowa, Wisconsin, Minnesota and Michigan.

Succeed with

Westhauser's Nursery Stock

Hello Friends:

Here we are entering our 1941 selling season and take great pride in presenting to you our new Nursery Buying Guide, with a wonderful selection of STANDARD and NEW PROVEN varieties. Also many BARGAIN assortments.

We hope that you will enjoy reading this book and convince yourself that our prices are within reach of all.

Quality and Fair Prices

Hard work, ripe experience, sufficient working capital and up-to-date farm machinery have put us in a favorable position and have a strong bearing on QUALITY and PRICE. Our soils are improved yearly with cover crops, manure, etc. We have made every effort to live up to our reputation to produce and offer only SUPERIOR NURSERY STOCK, and we believe that we have fully succeeded.

Buy Our Hardy, Heavy-Rooted Stock

Every plant, bulb and tree is state inspected and certified disease-free, well stocked with plant food and minerals, chuck full of vitality. Nursery stock of this caliber can't help but make money for our customers.

We have thousands of unsolicited letters from satisfied customers on file, complimenting us on our heavy rooted stock and the wonderful results they have had.

They come to us year after year for their nursery supplies, thus helping us progress in our ambition for higher accomplishments.

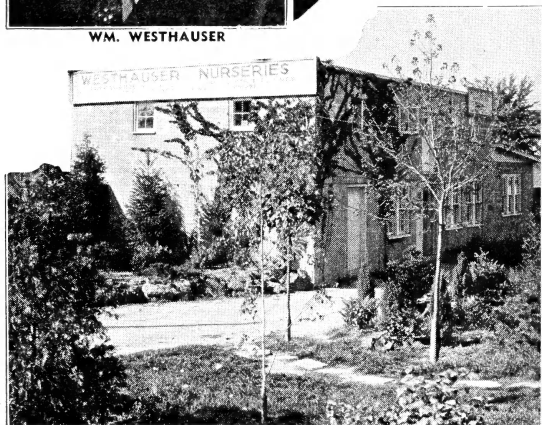

Our Responsibility of Leadership

Is in selecting only the BEST PROVEN varieties in the nursery line for our customers, which must and will go on. Only after years of careful testing of NEW VARIETIES do we actually bring to you in our Guide Book the varieties to plant for SUCCESS.

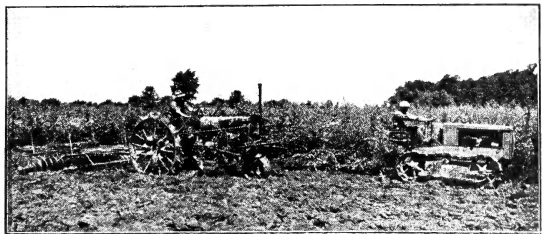

We, for instance, refer you to the GRAND CHAMPION, the sensational spring-bearing Strawberry, introduced by us a few years ago, which has been, since its introduction, a SELL-OUT with us, and is gaining more favor from year to year. WAYZATA, the HONEY-SWEET Everbearing Strawberry, by far the best everbearer today, is grown extensively by us. GREAT MASTER, the fancy late spring-bearing Strawberry. BOYSENBERRY, BLUE-BERRY and THORNLESS BOYSENBERRY.

Discing Under Heavy Cover Crop to Supply Humus and Minerals to Our Land

We Dig Our Plants Carefully by Hand. Here are Some of Our Diggers

Our Broad GUARANTEE is Your Protection

WE GUARANTEE that our nursery stock is first-class in every respect, free from disease, freshly dug, true to name, and to reach you in good growing condition. We will at our option either replace free of charge or refund your money on any shipment which arrives in bad condition, providing claim is made within five days after arrival of shipment, with a signed statement from your Express Agent or Postmaster, showing the extent of damage.

Our stock is carefully handled and full of vitality, and, under ordinary conditions, should grow for you. But if it does not, owing to the weather and other conditions over which we have no control, we will replace it at half price the following season, if you notify us not later than October 1, 1941.

It is understood between purchaser and ourselves that we are not liable for any greater amount than paid for stock.

A Beautiful Shrub That is Uncommon, Yet Easy to Grow —COTONEASTER DIVARICATA

This unusual shrub has a graceful, spreading habit of growth, making it ideal for planting in front of taller growing shrubbery. The tiny, dark green leaves are shiny like holly leaves, most unusual. In fall the leaves turn red and orange and hang on the bush well into the winter. White flowers are produced in great profusion, followed by red, egg-shaped fruits in beautiful, conspicuous clusters. Hardy and easy to grow.

Fortunately we have a supply of strong, 12 to 18 in. plants, that we are offering our customers this year at the exceptionally low price of

TRANSPLANTONE

"A Vitamin-Hormone Stimulant for Rooted Plants"

Transplantone is a water-soluble powder containing Vitamin C, Vitamin B₁, and other parts of the Vitamin B complex PLUS root forming Hormone. These chemicals are essential for plant growth. Hormone initiates roots and the Vitamins take care of their continued growth.

HOW IT WORKS

Inevitably roots are broken or disturbed when growing plants are moved, naturally growth is interrupted until plants put forth new roots. Then, too, there is usually a severe water loss, causing the plants to wilt. TRANSPLANTONE solution RE-INVIGORATES the plant by doing these four things:

- 1—Reduces Wilting
- 2—Invigorates Old Roots
- 3—Multiplies New Roots
- 4—Reduces Loss in Transplanting

3-oz. can makes 30 gallons of solution for re-invigorating growth at planting time, or 3,000 gallons of solution for weekly watering. Enough for a season in the average garden.

HOW TO USE IT

Dissolve a level teaspoonful in a gallon of water and sprinkle plant immediately after transplanting. In case of potted plants, or trees which are transplanted with a ball of earth, soak the soil around the roots with the solution. Dormant or "bare-root" plants should be soaked in solution for not less than one hour or more than two hours before planting. It performs miracles. Be the first to benefit from using Transplantone. It can be shipped with your nursery order.

Now! Two Types of BOYSEBERRY

Regular Boysenberry AN ESTABLISHED COMMERCIAL MONEY-MAKER

MADE A PROFIT FIRST YEAR
Mo., Aug. 4, 1940.

Mr. L. Norwood reports: "The Boysenberries produced very well this year. I sold enough to cover all expenses they had cost me, including crates, and boxes, with a profit besides."

BOYSENBERRIES CREATED A SENSATION

Mr. Wm. Tynedale, of Washington, writes: "The Boysenberry plants that I bought last year raised their first crop this year and what a sensation they created; the talk of the community; unable to supply the demand. I have had lots of demand for plants."

Thorny Boysenberry Prices:

1 plant for	...\$0.25
6 plants for	... 1.00
12 plants for	... 1.75
25 plants for	... 3.00

For four years editors of farm and garden magazines have written about this new king of all BRAMBLE berries. Has produced 11,500 one-pound baskets per acre, which sold for \$1,737.50 on a roadside stand. The berries are 1½ to 2 inches in length, color a beautiful purple, similar to Youngberry, but more highly flavored and less seedy.

Buy Westhauser's Northern Grown Plants

Large, Thrifty, Heavy-Rooted — They Are in a Class by Themselves for True Quality.

The Boysenberry was originated in California. Five years ago we bought our plants from that source, with the intention of developing and hardening them in our northern climates; now we believe that we are the largest growers here in the North of hardy Boysenberry plants. They have come through below-zero weather splendidly; they are also drought-resistant—four years ago when we had an extended drought we did not lose one of our entire plantings. Today about fifty per cent of Boysenberries offered are still southern grown plants. Be safe and buy our hardy northern grown plants.

Regular Boysenberry

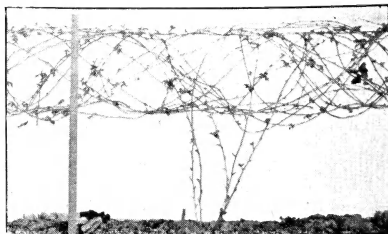

The Flavor of Boysenberry is Superb

It is a mild, rich, pleasing blend of the Raspberry, Loganberry and Blackberry. You will be proud of your Boysenberries, your neighbors will admire them, and you will agree with us, saving that they are the finest berries you have ever tasted, either fresh, canned, in pies, jams or jellies.

How to Grow Both Types of Boysenberry

Set plants 8 by 8 feet apart, both in and between the rows, as the root system spreads out considerably in search of moisture and plant food. The Boysenberry makes a very thrifty growth the first year. The vines often grow 10 feet. Let the vines creep on the ground the first year, and in the more northern states, the extreme North, cover lightly with straw, leaves or soil before the hard frosts begin, just to be on the safe side. In the spring remove this covering, and when the Boysenberry commences to bud, tie the vines to a trellis or wire, stretched on posts about 2½ feet from the ground. Right after fruiting, cut old vines down to ground, remove and burn them, this throws all the strength and energy into the roots for producing young vines, as it is these young vines that bear the fruit crop the following season. As outlined above, leave the young vines on the ground during fall and winter; in the spring, tie them to the trellis, etc. Repeat this practice year after year. Now a word about fertilization: humus is always welcome. Barnyard manure, decayed leaves or vegetable matter of some sort worked well into the soil along the rows is beneficial to the Boysenberry; however, if this sort of fertilization is not available, we recommend the use of a combination commercial fertilizer, applied at the rate of 200 to 500 pounds to the acre, or one-fourth to one-half pound to a plant; this, of course, should be well worked into the land, either by drilling or harrowing. You can secure this commercial fertilizer from most every hardware or feed store. About 600 plants to the acre.

Photograph taken in early spring to show clearly how to arrange Boysenberry canes on wire for best results.

N BERRIES

The New THORNLESS BOYSENBERRY

No "Stickers"—10 Days to Two Weeks Earlier

BRINGS HOME THE BIG MONEY. As it ripens 10 days to two weeks earlier than its parent (the regular Thorny Boysenberry). This is a decided advantage for the grower who wants to get his berries onto the market while prices are at the top. Because it is earlier it does not interfere with your regular Thorny Boysenberry that commences to ripen when the Thornless crop is about all cashed in. The Thornless bears as heavy, if not heavier, than the Thorny Boysenberry.

FLAVOR. Like its parent plant, whose reputation is known the country over for its pleasing flavor, the Thornless also have a pleasing flavor; that is, just a little more spicy. It seems to us that the red raspberry flavor predominates.

A PROVEN STRAIN. The Thornless Boysenberry is a sport or offspring of the regular Thorny Boysenberry. While many Boysenberry plantings have had occasional thornless "sports," they have been found to be valueless. Let that be a warning to the wise, be sure you get your plants from a proven strain. The sport out strain originated from is a distinctive success. It has all the characteristics of its parent (the regular thorny type Boysenberry), except that it has no thorns, which makes it convenient and a pleasure for the home gardener to pick and handle. Since it is easier to handle, it means a labor saving to the commercial grower.

HARDY. Since it originated from the regular Thorny Boysenberry it is very hardy. It has stood 40 degrees below zero without any covering in the winter, but we advise our customers in the colder sections to cover them lightly with straw or other material just to be on the safe side.

Two years ago we paid 45¢ each wholesale for our first planting. We have expended a great deal of effort, time and labor in propagating this fine berry to bring it to you.

SUPPLY IS LIMITED. Be the first in your neighborhood to have this outstanding berry. Culture is the same as that of the regular thorny type, see page 4.

A Mighty Newcomer

No other new variety has created such a quick and great demand and popular favor as the Dorsett.

Dorsett ripens with Premier or perhaps a day or two later, depending on the type of soil they are grown on.

Foliage is vigorous, healthy, dark green, upstanding and has a very thrifty appearance. 8 to 10 inches tall.

BERRIES ARE LARGE AND FIRM, considerably larger than Premier, very attractive, glistening bright red, firm, and appeal to the buyer of fancy berries. They ripen evenly all over, keep their fresh picked appearance on arrival at long distance markets. The flavor is sub-acid, richly sweet and satisfying. See illustration in color on front page.

A large commercial berry grower who grows the best standard varieties, says that he considers the Dorsett the most valuable variety he has grown, and if he could limit himself to one variety, he would choose Dorsett.

Fairfax

**Early to Midseason
The Sweetest Spring-
Bearing Strawberry**

The Fairfax ripens 3 to 5 days later than Dorsett, offspring of the same parents as Dorsett.

Fairfax, like Dorsett, makes plants freely; however, the foliage does not grow quite as tall as the Dorsett, the leaves are large, tough and disease-resistant, the plants spaced farther apart, similar to Premier.

The berries are fully as large as Dorsett, often 1½ inches through and red to the core, the shape is somewhat irregular, the color is medium to dark red, very shiny and polished appearing, covered with prominent yellow seeds.

The flavor is the best of any spring-bearing Strawberry; we have many letters from customers who tell us that they get more for Fairfax in their home stores, the trade calls for Fairfax by name and appreciate their superior quality.

DUNLAP—The Old Standby

(Midseason)

The berries are medium to large, conical and often slightly necked, dark crimson with a deep red flesh, quality very good. The plants are healthy and vigorous. Very productive. Grows on all kinds of soil, and in extremely cold climates. The best variety for canning and a good pollinizer for pistillate varieties. It can be shipped to distant markets. Holds up a long while after being picked. Season a few days after Premier begins bearing.

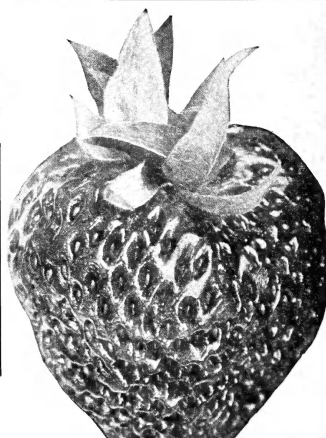

AROMA

(Late)

The well known berry that has been on the market for many years. Berries are a glossy red, and have a very pleasing flavor. It is one of the best berries grown for long distance shipping as well as being a home favorite. A trial will be sure to make friends and bring repeated orders.

**Earliest—
Most Profitable**

Premier is the earliest Standard Strawberry to ripen. It gets on the market when there is no competition, thus it receives the highest prices. This fact alone makes it a great money maker. The berries are large, of a beautiful glossy red appearance, very firm and stand long distance shipping well. It holds its size to the last of the season. Premier is supreme for eating, canning, local and long distance marketing. It is a strawberry for every purpose wanted. The plants are very productive, sturdy, long rooted, good drought resisters, and make good on any kind of soil.

Westhauser's Improved Strain Are in a Class by Themselves

On our farms we have grown Premier for 18 years and are known throughout the country for our vigorous, productive stock which has been built up to its present perfection. Get started right and buy **Westhauser's Improved strain.**

Dear Sir: From your 2,000 Premier plants I harvested 2,400 quarts of No. 1 berries last summer. I did not keep count of the smaller berries. I am going to plant three to five acres.

MRS. F. L. DAVIS,
Virginia.

FUJIYAMA

This Japanese variety is really well named, being named after Japan's famous largest mountain, Mt. Fujiyama. Fujiyama is the largest of all Strawberries. Berries have been known to measure 7 inches around and weigh nearly 2 ounces. Fujiyama is a home use and nearby market berry, being not quite firm enough to ship far. Makes a beautiful plant and picking row, and produces like Premier. Ripens midseason to late, and holds its size well to the end.

GRAND CHAM

ONLY FROM WESTHAUSER
CAN YOU BUY THE ORIGINAL STRAIN

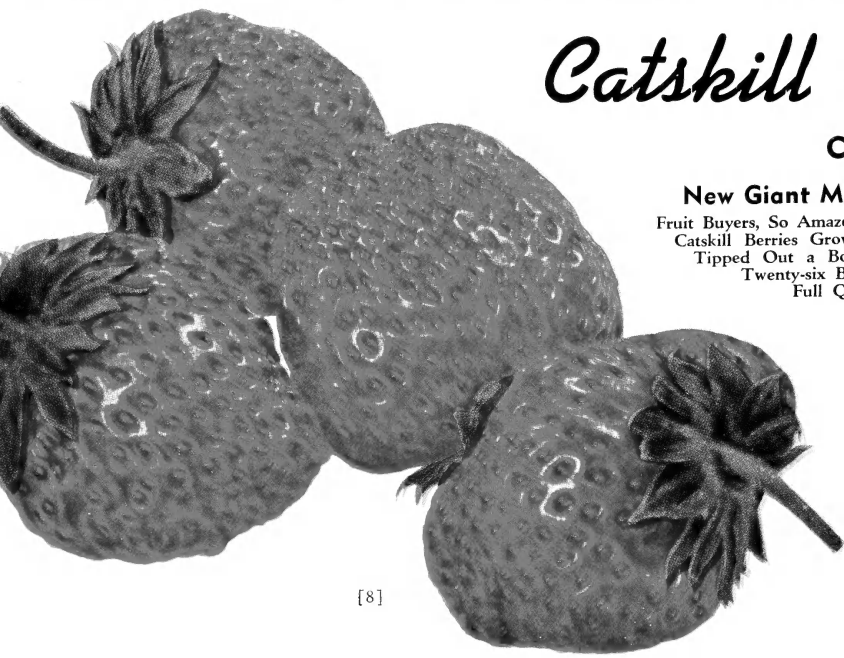

Grand Champion was found as a single seedling on a decaying tree stump, produced 30 plants, which were set out on a space of 66 square feet; we harvested 105 quarts of berries of this setting the next spring.

Over 5000 Quarts on One-Half Acre

Two years later in spite of heavy frost while they were in bloom, and almost continuous rain during the harvest, we picked over 5000 quarts of berries from one-half acre. The tall, heavy foliage protects the blooms from late spring freezing, and then, too, they bloom over a long period, ripening a few days after Premier; bear during the entire spring Strawberry season and still compete in quality with Aroma, which is a late variety. We have picked berries over a period of over 40 days.

PION

The Berries

For canning and preserving they are in a class by themselves as they are coreless and retain their shape and flavor in the can. Their rich red color, the extra large size, beautiful appearance and high quality attracts the fancy fruit buyer. We have received a premium on our Grand Champion ever since we have grown them.

What Our Customers Say About Grand Champion

Wisconsin.
I want to write you about my Strawberry plants which I purchased from you last year. I was pleased with the Grand Champion—had a wonderful crop of excellent quality. I set several varieties which were good, but nothing compared to Grand Champion.

Yours truly,
ALVIN NITZ.

Ohio.

Westhauser's Nurseries.

Gentlemen: Last spring I bought 2000 Grand Champion Strawberry plants from you and I want to tell you what fine success I had with these plants.

Grand Champion beats them all for size, appearance, and fine quality. I grow only the better kind of Strawberries. My customers paid me a premium on Grand Champion and I always was sold out of them first. Not only are they larger than any other variety, but there were twice as many of them and picking was a pleasure and most profitable.

SPRING BEARER

At last we are able to offer an outstanding and highly profitable midseason Strawberry.

This variety was introduced a few years ago by the New York Experiment Station. Does well on any kind of soil. We have fruited Catskill this year and were surprised by the size, beauty and quantities of berries produced this extremely dry season.

Catskill is self-pollenizing; the berries are dazzling bright red, like Premier, size like Fairfax or larger, on strong fruit stems, and hold their size to the last. In 1935 a three-acre lot produced 32,000 quarts of berries. The plants are large and sturdy, producing strong runners; the leaves are extra large; a free plant maker.

A New Late Money-Maker GREAT MASTER

Great Master is a seedling discovered fruiting a few years ago. For years we have scoured the country over for just this type of a real worth-while late berry. After watching Great Master and putting it through the most rigid tests we were amazed to find it really exceeded our fondest hopes. It is a large, real firm, fancy, glossy berry with a superb flavor of its own, outbears other late spring bearers two to one. The flowers are self-pollenizing.

The plants are large and thrifty, make many runners, but space their plants far enough apart to insure large size berries; they ripen about three weeks later than Premier and mature every berry to full size.

We feel that we have done the Strawberry world a real service by adding such a valuable variety to the Strawberry family. Watch Great Master, buy a few plants and be the first in your locality to grow this outstanding wonder berry, prolong your fruiting season and have fancy berries when others are gone.

The supply of plants of Great Master is limited. Only 300 plants to one customer.

Red Flowering Dogwood

Chinese Magnolia

Red Flowering Dogwood

(*Cornus florida rubra*)

Beautiful red flowers on a Dogwood. These appear in April and May before leaves appear. Ultimate height about 20 feet. Foliage deep green, changing to bronzy red in autumn. One of the best of all ornamental shrubs. Plant 12 to 15 feet apart. Heavy rooted, twice transplanted stock. Prices: 3 to 4 ft., \$1.75 each; 2 for \$3.00; 4 for \$4.15.

Purple-Leaved Plum

(*Prunus Cistena*)

A New Purple Leaf Plum. Shows more red in the colored leaves, lower growth and more compact than the common variety, glossier leaves. This dwarf tree comes out red in the spring, stays red all summer and is bronze-red in the fall. Beautiful single flowers in May. Prices: 2 to 3 ft., 50c each; 3 for \$1.20; 5 for \$2.00.

OUR NEW RAINBOW GLADIOLUS ASSORTMENT

20 Varieties - Assorted Colors

All bloom this year. Bulbs over 3 inches in circumference.

Guaranteed to include 10 per cent Picardy, grows 3 to 5 feet tall, produces enormous Tea-Pink flowers, often 6 inches across. Balance is made up of Newer and Better Bulbs. A complete array of colors. All prepaid. 25 bulbs, 75c; 50 bulbs, \$1.00; 100 bulbs, \$1.50, net, no discount. Write for special prices on larger lots.

Chinese Magnolia (Magnolia Soulangeana)

Let's change "Magnolia" to "Magnificent" for no name could be better suited to this glorious tree. Truly Magnolia is the aristocrat of all flowering ornamentals.

Produces immense 3- to 5-inch flowers in the spring before leaves appear. Leaves large and glossy. A highly ornate specimen at all times of year. Grows 18 to 20 feet tall. Admirers will come by your home just to see this amazing beauty. One customer wrote us in June that the Magnolia he purchased from us this spring has two blooms $4\frac{1}{2}$ inches each and lasted over a month, which to him had already been worth the price he paid for it, he so enjoyed these blooms which were so magnificent in size and color. 2-year, 20 to 24 in., branched, field-grown stock, twice transplanted.

PRICES: 24 in., \$1.75 each; 2 for \$3.00; 5 for \$6.50.

All prepaid. Net, no discount.

Rosa Rouletti

Blue Skylark HARDY ASTER

Planted in May, we actually counted 800 blooms on one plant. We are listing this wonderful Aster with the mum family. They have about the same blooming season, from early September to November. Blue Skylark is a very thrifty plant, grows from $2\frac{1}{2}$ to $3\frac{1}{2}$ feet high, can be planted for border planting or in back of smaller flowers like glads or mums on account of its great height. They are fine for individual bouquets or fit in beautifully with glads, mums, or other fall flowers. 25c each; 3 for 60c; 10 for \$1.00; 25 for \$2.10.

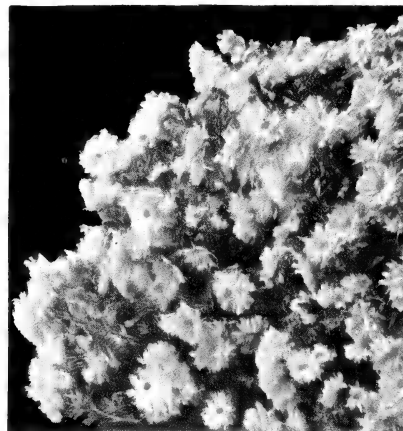

Blue Skylark Aster

Egyptian 'MUM

Very Hardy Perennial

Similar to Pink Cushion and Azaleamum. Stronger grower and richer in color, blooms first year planted from August to late in fall, dainty rose-like buds opening to soft pink flowers; rapid grower, grows from a small plant to a mound the size of a bushel basket in one year with from 500 to a thousand blossoms on each plant, a gorgeous flower bed by itself; or if you are looking for a dainty, beautiful border for your flower bed, plant Egyptian 'Mum. 30c each; 2 for 50c; 5 for \$1.00; 12 for \$2.00.

Westhauser's Improved Strain

Have Berries This Summer 60-90 Days After Planting

MASTODON Everbearer

Three Full Crops in Eighteen Months

When planted this spring, this wonderful variety will produce a crop in July and continue bearing until late in the fall. The second spring, the plants begin to fruit with the June varieties and continue on during the season.

The large size, fine quality and delicious flavor make the Mastodon a marvel of Nature. No wonder the demand for plants has increased from year to year. The demand for Mastodon exceeds the supply every year. Avoid disappointment by ordering early. Your plants will be reserved and shipped to you at the proper planting time.

The
NEW
Everbearing
Sensation
GEM

A WONDERFUL EVERBEARER

Foliage

For an Everbearer GEM is a heavy plant-maker and produces a larger fruiting row than any other Everbearer we know of. The plants are very hardy, not subject to leaf blight.

Size and Appearance

The berries are large size, very uniform, and held their size even throughout the dry weather we had last summer. They have the appearance of an over-size Premier berry. The color is a deeper red, very glossy, and they have a very fancy appearance.

Flavor

The berries are very sweet and have a flavor like the Progressive variety. The flesh of the berry is very fine grained and red clear through. Very little sugar is necessary to bring out the flavor.

Firm for Shipping

The berries are extremely firm and stand long distance shipping well. If you are in the market for an outstanding firm and fancy Everbearer try GEM this year. The supply, of course, is very limited, as only a few nursery firms are in possession of this great new variety. Play safe, order now.

Westhauser's

The World's Greatest Ever-
bearer **OUTYIELDS ALL**
Other Everbearers

2 TO 1

At last we have an everbearer with **ALL THE GOOD POINTS**. Large, honey-sweet, uniform, firm berries with an even red color all over that are red to the core, no green tips. It is drought resistant, and is adapted to a wide range of soils from clay to sandy soil. Repeatedly outyields other everbearers at least 2 to 1.

Today, October 15th, we have picked a large quantity of Wayzatas for the market.

THE HONEY-SWEET Berry Without a Fault

Everyone who has tasted Wayzata proclaims it the best flavored Everbearer of today. Those who have

started out in a small way with Wayzata come back year after year with a substantial increase in their orders in spite of the high prices. This wonderful berry loses no time in paying you back for your investment; starts to bear its first crop approximately 60 days after being planted, continuing to bear from then on, often as late as November; again the following spring you will get a fine crop, and then a third crop from July until snow flies.

For those who want the best in an Everbearer we recommend Wayzata. It yields an abundance of quality, delicious, honey-sweet, large, red berries that bring premium prices on the market, and are much sought after by the home trade. It is the favorite in the everbearing family.

WITHSTANDS 30 BELOW ZERO

These large, extra heavy rooted Wayzata plants are very hardy; have stood 30 below zero weather. The thick, leather-like, dark green foliage that stands 8 to 10 inches high is free from leaf spots and other plant diseases. Crowns often multiply many-fold, which accounts for their heavy fruiting quality. They are so busy directing their energy to fruiting they do not make as many runner plants as other everbearers do, which, together with the great demand, keeps the price of plants rather high. For that reason plants are scarce and will be for some time to come. The Wayzata has been a sell-out with us every year and we are obliged to return many orders. Be on the safe side. Order early and have your plants reserved.

Westhauser Nurseries,
Sawyer, Mich.

Gentlemen: The 5000 Wayzata Strawberry plants I received from you this spring were as fine as could be grown anywhere. The quality is unsurpassed; they are sweet, have a very pronounced flavor and aroma, and are firmer than most everbearers. They are very attractive and ripen uniformly. Enclosed is a photo showing them 90 days after planting, fruiting heavily. You can look for a fine order next January.

Respectfully, A. K. FORBES.

We Are the Leading Grower in the World of Wayzata Plants

See photo above. By careful selection of plants and specially prepared land we have so built up our strain that they are now in a class by themselves. We have commercial growers who have bought their Wayzata plants from us for the past 5 years in 5,000 and 10,000 lots, while other everbearing varieties could have been bought for a fraction of what they paid us for Wayzata. THERE IS A REASON.

**WESTHAUSER'S WAYZATAS
ARE THE BEST IN THE
COUNTRY** says Mr. Duncan of
Missouri:

Dear Mr. Westhauser:

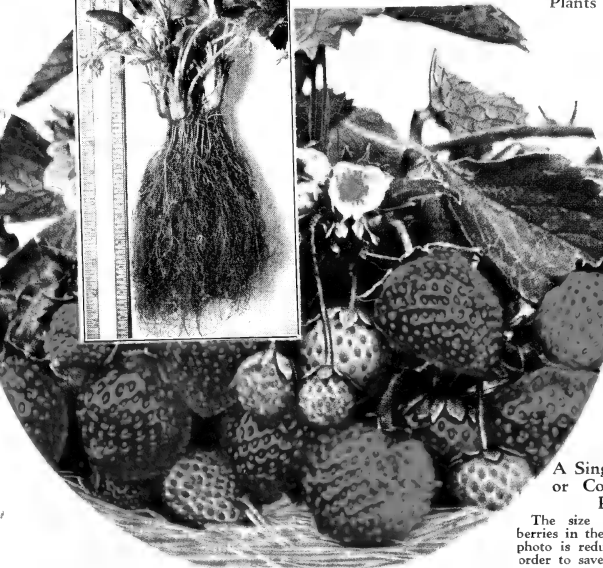

I want to thank you for the fine plants you sent me. I never saw such thrifty plants. My Wayzata clumps will be the size of a half-bushel basket by midsummer. You deserve lots of credit for pioneering such a supreme variety. Even the last 1000 lot of clumps, which I ordered in November, came through fine. The Wayzata is my favorite. Your efforts and the Michigan climate is the only place in the country to produce such quality. Have had plants from eastern states, but their stuff is over-worked and cannot compare with your northern quality.

WAYZATA

**Delicious Honey-Sweet
Bears 60 Days After Planting
3 Full Crops In 18 Months**

Wayzata Clump or Combination Plants

Grow Enormous Size—Often 12 to 15 Inches Across. Fifty Plants Will Supply the Average Family with Berries During Summer and Fall.

**A Single Clump
or Combination
Plant**

The size of the berries in the above photo is reduced in order to save space.

Wayzata Clumps

1 for	\$0.25
6 for	1.00
12 for	1.75
25 for	3.00
50 for	5.50
75 for	8.00
100 for	10.00
200 for	17.50

The Wayzata makes runner plants in limited quantities, but joins a number of new plants with new roots to the mother plant. This combination of plants appear as one large plant with a number of crowns, which is the reason Wayzata out-bears all other Everbearing Strawberries. Nature provides each crown with a number of fruit stems and blooms which are formed before winter, remaining dormant until plants are transplanted in spring, which come to bloom shortly after. "In other words, you get an extra crop of berries" in spring—they bear again in late summer and fall. We recommend these large plants for Hill System Culture especially for small plots and gardens, planting them 20 in. by 20 in.

FERTILIZER

The Wayzata Clumps possessing such a large root system, and the fruiting possibilities governed only by the humus and minerals in the soil, we recommend PEAT MOSS, which is rich in humus, nitrogen, and other minerals (unless your soil is rich in humus), about 10 quarts to each 50 Wayzata clumps. Peat Moss absorbs water and holds moisture ten times its own weight. Mix about 25 per cent with the soil in the openings that you plant the Wayzata clumps in. See page 17 on Peat Moss.

WESTHAUSER'S EVERBLOOMING ROSES

Giant Cultivated

BLUEBERRY

ONCE PLANTED—LAST A LIFETIME

Profitable - Beautiful

**Get Started
Offer**

8 3-year Bearing-size Blue-
berries
2 bags (4 bus.) of Peat
Moss
Net, no discount **\$4.79**

20 1-year Blueberries
2 bags (4 bus.) of Peat
Moss
Net, no discount **\$6.79**

Not only does the cultivated Blueberry produce
juicy and delicious berries two to three times as
much as common Blueberries, resembling in size a
bunch of Delaware grapes and selling for 40c to 60c a
quart, but they are beautiful ornamental bushes
reaching 6 to 8 feet in height. The foliage is dark
green, long and narrow, blossoms bell-shaped and
pinkish white.

CROSS POLLINATION. At least
TWO PLANTS should be planted for cross
pollination. This insures more berries.

1-Year Plants — Vitamin B₁ Treated

Before shipping, the root system of each one-year-old plant is treated
with a Vitamin B₁ solution, then bedded in Peat Moss and wrapped in wax
paper. This is certain to give the plants a very much easier start. Protects
them against transplanting shock, which ordinarily occurs. These plants are
especially recommended to both home gardener and commercial grower.
WRITE FOR PRICES ON QUANTITY LOTS.

2-Year Transplants

Are nicely branched and have a heavier root system than the one-year
plants, and will begin bearing the following year.

3-Year Transplants Balled and Burlapped

Are 40 to 15 inches tall, heavy branched canes whose root systems are
accordingly heavier, with a good setting of fruit buds; will bear this year.
They came balled (with some of the black soil in which they were grown)
and burlapped together with some additional Peat Moss. This assures
successful starting. Shipping weight 8 to 10 pounds.

Three Proven VARIETIES

After much experimenting and study we
decided on the following varieties and will
supply our trade as long as they last. How-
ever, we reserve the right, in case we are
sold out of some variety, to substitute any
of the three.

RUBEL. One of the most vigorous growers, upright,
very good grower, and the heaviest producer of
them all. Fruit is large but a little tart. Good
shipper. Leaves turn red in fall. Very ornamental.
Fruit borne in clusters.

RANCOCAS. Vigorous, upright grower. Very pro-
ductive. Fruit sweet and fine flavor. Ornamental.
Fruit borne in clusters. Midseason to late.

JERSEY. Ripens a few days later than Rubel. Bush
is upright. The berries are of good quality, large
and firm. A favorite with the commercial grower.

How to Grow Blueberries SUCCESSFULLY!

If your soil is not very acid we recommend that a handful of sulphur be
put around the plant in spring. In addition to suggestions given below fer-
tilize one-year-old plants with half an ounce of sulphate of ammonia, for older
plants increase at the rate of half an ounce for each year. **CAUTION:** Keep
fertilizer off plants. The above are inexpensive and can be purchased from your
local hardware or feed store.

Blueberries prefer a loose, acid soil, with fair drainage. However, where
these conditions do not exist, they can easily be created by a little extra effort.
For three-year plants, make openings 15 by 15 inches by 12 inches deep, mixing
about 30 per cent of the soil taken out of the opening with even quantities
of the following (either all of one or some of each): decayed wood, half-
decayed leaves, rotted straw, or vegetable refuse—mix with 2 to 3 quarts of
peat moss. Fill the opening partly with this mixture, place plant in center of
opening and firm dirt well around the roots.

For 5- and 7-year plants, make the openings larger accordingly. Although
the 3-, 5-, and 7-year plants are balled (with some of the soil in which they
were grown) and burlapped, we recommend that five to ten quarts of peat
moss be added for each plant for best results. Water in dry weather as any
other shrub. You will be well repaid for your efforts, for a bearing Blueberry
bush is a source of beauty and profit.

Write the U. S. Department of Agriculture, Washington, D. C., for Bulletin
on Cultivated Blueberries. It's free.

Insure Successful Planting With WESTHAUSER'S PEAT MOSS

Peat Moss consists of dry acid vegetable humus, nitrogen,
phosphate, and other minerals. It is of a feathery light tex-
ture, holds about 15 to 20 times its own weight in water. For
BLUEBERRIES, AZALEAS and EVERGREENS it makes
growing success doubly sure. As a soil conditioner it adds
humus and the most important minerals to the soil, and makes
other minerals available.

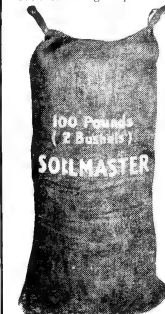

For your convenience, especially for the blueberry buyer, we
have put the peat moss up in 10-quart bags. They are light
in weight and can be included in your parcel post or express
orders. Larger quantities, for economy's sake, we recommend
shipping by freight. We wish to call
your attention to freight rates, as three 2-bushel bags
can be shipped practically as cheap as one 2-bushel bag;
that is, the freight is no more on 100 pounds than on
40 pounds.

PRICES: 10 qts., 20c; 20 qts., 40c; 2 bus. (1 bag),
95c; 4 bus. (2 bags), \$1.70; 6 bus. (3 bags), \$2.40;
8 bus. (4 bags), \$3.25. Larger quantities for larger
plantings or lawns, use 1 cubic yard or 22 bus. (11
bags), \$6.00. Peat Moss Prices are Net. No Discounts
or Free Goods Allowed.

SOILMASTER

Soilmaster is a decomposed, concentrated leaf-mold
and decayed vegetation. This is the humus to use on
lawns, around shrubs and in your garden. Holds seven
times its weight in moisture, and is a good fertilizer.
Is ideal for the farm home, garden or suburban home.
Makes the soil mellow and prevents baking. Two-bushel
bag, which is approximately 100 pounds, is enough for
100 square feet of lawn or 8 good-sized shrubs or orna-
mentals. You are assured of a three-years' growth in
two years' time by using this humus.

PRICES: 2-bus. bag, \$1.00, net, no discount.

Hansen BUSH CHERRY

The new quick bearing Cherry
Easy to grow
Sure to produce
Hardy everywhere

Rapid growing shrub, can
be planted singly or in groups,
also makes a gorgeous hedge
with its snow-white blooms.
They may be planted in
groups. The Bush Cherry pro-
duces delicious, plum-shaped
cherries, fine for eating fresh
from the bush, has a wonder-
ful flavor; excellent for jams.
The bush grows 4 to 5 feet
high with a 3 to 4 foot spread.
The foliage is very attractive,
silvery green turning to red
and gold in fall. 3-yr., strong
bushes, 2-2 1/2 feet, 50c each;
3 for \$1.00; 6 for \$2.00; 10

Westhauser's BLACKBERRIES

CERTIFIED FREE OF DISEASE by Michigan State Department of Agriculture

ELDORADO Productive, Firm and Profitable

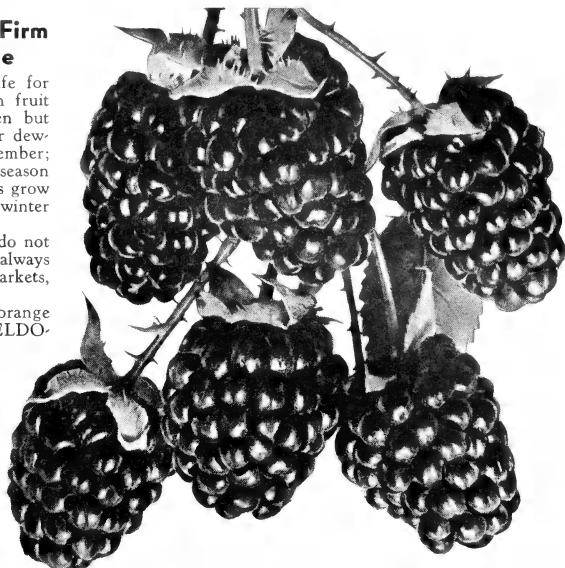

The choice of the commercial grower and housewife for the good old-fashioned jams, pies, preserves and fresh fruit for the table coming just after raspberry season, when but little other fruit is available. They ripen 10 days after dewberries and the harvest extends to the fore part of September; they are the last of all spring and summer berries in the season and the trade is willing to pay well for them. The canes grow sturdy and upright, and are hardy enough to need no winter protection.

The berries are large, uniform in size, jet black, and do not turn red after being picked. They have a flavor that always calls for more and are firm enough to ship to distant markets, assuring good prices.

Its hardness and freedom from disease, especially orange rust, the common enemy of all Blackberries, has made ELDO-RADO the leading variety with the commercial grower.

ELDORADO 1-YEAR PLANTS are individual plants; that is, part of the roots of the old plants are cut off and planted in spring. They produce a nice fibrous root system and a good top growth.

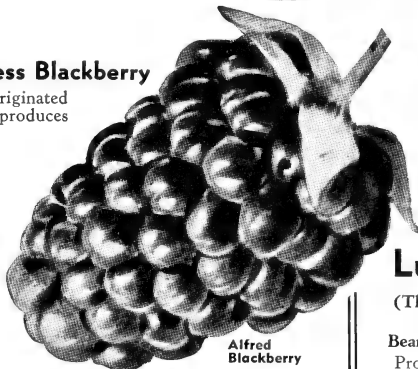

ELDORADO 2-YEAR BEARING SIZE TRANS-PLANTS. If you want a crop of Blackberries this year, our transplanted root cutting plants will do it. They are sturdy and have a fine root system. They have been reset in nursery rows for two years, and will bear fruit a few months after planting. Of this variety, we have only a limited amount, so order now and play safe.

ALFRED

The Coreless Blackberry

The coreless Blackberry, originated in Michigan, the state that produces fruit with the flavor. The color is a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. A hardy plant that produces mammoth berries, often one and three-fourths inches long. It does equally well in cold sections. Why not include a few in your order and get started raising this profitable berry?

Lucretia Dewberries

(The Creeping Blackberry)

Bearing-Size Plants

Produced on a trailing vine instead of a bush, does best when supported on a wire, like grapes; free from rust and all fungous diseases. The berries are even larger than blackberries. They are jet black, coreless, sweet and juicy. The Lucretia so far surpasses all other kinds of Dewberries that we have discontinued raising other varieties.

There is no comparison at all with other Purple caps. The large, round, meaty berries, measuring 1 to 1½ inches, have a delicious mild flavor, and is preferred by canners to either the red or black raspberry for jellies, pie and marmalades. The fruit is bright reddish purple; the seeds are very small. It is especially good to eat fresh. The berries do not crumble, and cling to the branches long after ripening. Bushes are very thrifty, healthy, disease free, upright growers that attain the height of four or five feet.

CUMBERLAND

The Leader of the Blacks

50 Plants Now Only \$1.60

(Midseason.) The leader among all Black Raspberries. Popular with growers, as it does well in any climate or any well-drained soil. The large, rich, black berries present such an attractive appearance that buyers pay the top-notch prices for them. Excellent for table use and canning. The Cumberland sets so many berries that it is necessary to give them a severe trimming.

On the Benton Harbor market, the largest cash fruit market in the world, more Cumberlands were bought than any other Black Raspberry, a fitting testimonial to its high regard by the grower and consumer. In years past we have had to return many late orders with the disappointing words: "Sold out." Moral—Order Early.

LATHAM

The Standard
Commercial Red

Now Only \$1.75 for 50 Plants

Latham has made good as the best medium to late variety in all sections of the country. Originated in Minnesota where the severe winters are a test, but it does not winter-kill even at 45 degrees below zero. This is a large, most beautiful and profitable red Raspberry. Rich, dark red berries an inch in diameter are quite common. They stick to the stem days after they are ripe when other varieties would soften and fall to the ground. The fruit is firm, making it good for canning and shipping, as well as for table use.

CELTICED FREE OF DISEASE

By Michigan State Department of Agriculture

TAYLOR

The New Mammoth Size Streamlined Red Raspberry

25 Plants Now Only \$1.25

This new berry was introduced by the New York Experiment Station, tested over a period of years. The berries are very large, bright red, oblong-shaped, small cavity, uniform in size throughout season. Ripens a little later than Latham, and bears over a long season. Plants are tall, disease free; rigid, tree-like canes support heavy loads of fruit.

"Golden Queen" Raspberry

Six 2-yr. Plants Only \$1.85

This new yellow Raspberry is much sought after as a novelty for the home garden. The rich golden yellow berries are very attractive in appearance, and deliciously sweet in flavor. They are a delicacy for eating fresh from the bushes and for table use. The berries resemble the Cuthbert in size and shape. The canes are hardy, sturdy, upright growing, almost thorn-free. Large two-year plants will start fruiting this year. Supply limited.

GOLDEN QUEEN PRICES

INDIAN SUMMER

The Giant New Everbearing Red Raspberry
TWO CROPS IN ONE YEAR!

12 Extra Large Plants Only 90c

Earliest to ripen in late spring, top prices are assured as it has the Red Raspberry market all to itself. The berries are long, deep red, small cavity, very rich in flavor. Plants are hardy, tall and very productive. At this writing, on the 4th of October, we are picking Indian Summer berries and expect to do so for a whole month. The writer brought a single twig to the office loaded with 129 berries ripe and green. What a sight of beauty to behold!

Westhauser's LARGE ROOTED, HEAVY-BEARING STRAIN OF Raspberries

New LOGAN Blackcap

An Early Dependable Black Raspberry

Ready for market a week to ten days earlier than the Cumberland, which allows the grower to make his profit while the price is high. The berries are as large as the Cumberland; bears heavily. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases.

For Prices of 1-Year Plants, see page 21.

BRISTOL

The Earliest Blackcap

One of the newest varieties from the New York Agricultural Experiment Station. It has proven itself to be the most outstanding early Black Raspberry of today. Fruit is large and very showy, is of a very glossy black color, firm and of excellent quality, produces a very heavy crop. Place your order early, the supply of plants is limited.

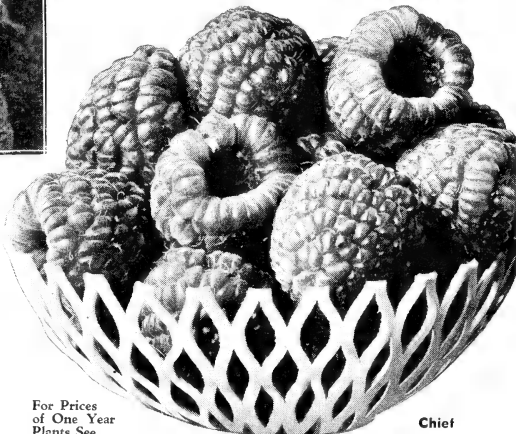

For Prices of 1-Year Plants, see page 21.

CHIEF Best Early Red Raspberry

Chief is an offspring of the Latham, originated in the northern part of Minnesota where the temperature goes 45 degrees below zero. It is the heaviest producing early red, comparing with the Latham in production. The bushes are strong and sturdy, foliage is of a healthy dark green. Leaves large and leathery like. The berries are extra large, firm and are of a beautiful snappy bright red. One of the finest berries for eating and canning.

Chief ripens a week or ten days ahead of other Red Raspberries. First on the market, therefore demanding top prices. **YOU MAKE NO MISTAKE IN PLANTING CHIEF FOR EARLY BIG MONEY, TO BE FOLLOWED BY THE LATHAM AND THE TAYLOR FOR A PROLONGED SEASON.**

GAIN A WHOLE YEAR!—Bearing Age Raspberries

Dear Sirs: The Raspberry plants did just fine, which I received from you last year. I was afraid I would not receive a catalog from you, but I got it and here is my order.

I could have bought them from some other company for less money but I know what your plants are.

Yours very truly,

Made Double Entire Cost of Plants the First Year!

MR. W. J. BEUSCHLEIN
OF DETROIT, MICH., WRITES:

"I want to tell you about the Latham transplants I bought of you. I set out 500 plants in March and in July I sold enough of these wonderful berries to pay for more than double the cost of the plants. I never heard of such a remarkable record for the first year. Next spring I will set out five acres; can you supply me with plants? I am more than satisfied and thank you for your co-operation."

YOU GAIN A YEAR and you can enjoy a crop of wonderful berries a few months after planting. But it is not the only advantage over one-year plants; you also will have most varieties a full fruiting row the second year.

WESTHAUSER'S SHADE TREES

Chinese Elm

Poplar

Silver Maple

SUGAR MAPLE (Rock Maple). A well-known native tree, having a very symmetrical, dense head. One of the best shade trees for street or park. 4-5 ft. trees, each 50c; 3 for \$1.25. 7-8 ft. trees, each 75c; 3 for \$2.00.

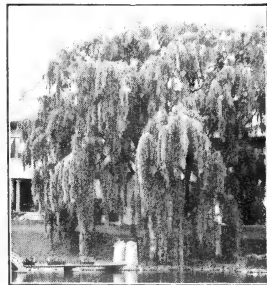

SILVER MAPLE. Rapid growing tree, producing a quick shade, suitable for street or park. Leaves irregularly indented, bright green above, silver beneath. 4-5 ft. trees, each 50c; 3 for \$1.25.

WISCONSIN WEEPING WILLOW. Grows rapidly; long, fine leaves on long sweeping branches reach the ground. 4-5 ft., each 60c; 3 for \$1.70; 10 for \$4.00.

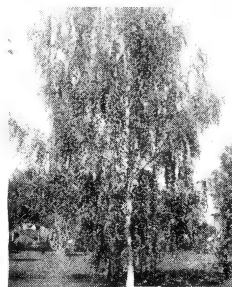

CHINESE ELM. Very hardy and a splendid tree for the drier portion of our country. A rapid grower, well rounded head, grows to a tall, spreading tree. Almost any soil suitable. Our trees are very sturdy, 4 years old, twice transplanted and cannot be compared with spindly 1- or 2-year-old trees grown on muck land. 5-6 ft. bushy trees, each 75c; 2 for \$1.40; 10 for \$6.50. 7-8 ft. bushy trees, each \$1.25; 2 for \$2.30; 10 for \$10.00. 8-10 ft. bushy trees, each \$2.00; 2 for \$3.50.

LOMBARDY POPLAR. Tall and slender tree with bright green leaves and silvery appearance on under side. 4-6 ft. trees, each 30c; 3 for 75c; 6 for \$1.45.

CUT-LEAF WEEPING BIRCH. A tall, slender tree of vigorous growth, with graceful drooping branches, silvery white bark and delicately cut foliage. 2-yr., 4-5 ft., each \$1.50; 2 for \$2.75. 5½-7 ft., each \$2.00; 2 for \$3.75.

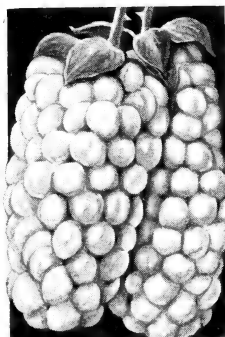

Wisconsin Weeping Willow

Weeping Birch

UNUSUAL NOVELTIES

White Blackberry

Tree Strawberry

or Strawberry-Raspberry

A very unique ornament as well as a fruit-bearing plant for the garden. Each year there is a new top growth, 15 to 18 inches high, and the fruit is borne in June on the same season's growth. The roots do not have to be transplanted and are good for many years. The fruit is large, cardinal-red, cone-shaped. It is the size of a strawberry.

Prices: 6 for 60c; 12 for \$1.00; 25 for \$1.75; 100 for \$6.00.

1 Bush Cherry

3 Blue Skylark Asters.

Net, No
Discount

Juneberry

Crystal White Blackberry

Strange as it may seem, this is a real creamy white blackberry. Mixed with the jet black ones for dessert, it makes a most wonderful dish. The fruit is about the size of Alfred with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden. Two-year giant transplants, bushes which will bear a good crop of berries this year, starting in August.

1-yr., No. 1—20c each; 6 for 90c; 12 for \$1.50; 25 for \$2.50. 2-yr. Transplants—35c each; 3 for \$1.00; 6 for \$1.85; 12 for \$3.00.

3-yr. Transplants, Extra Large—50c each; 3 for \$1.25; 10 for \$4.00.

Juneberry Bush

Juneberry Rare Ornamental Flowering and Fruiting Shrub

Is a tree-bush, grows to 6 feet high and spreads wide at the top; stems are shiny red in the winter, covered with white blossoms early in the spring, thus making it a rare ornamental shrub. The blossoms are followed by large, grape-size berries, reddish purple. Flavor like blueberry or huckleberry but not as acid. Edible and relished by all.

Prices: 2 to 3 ft. tall, \$1.00 each; 3 for \$2.50; 6 for \$4.00.

Late Summer and Fall Apples

YELLOW DELICIOUS. Best yellow Apple. It bears young and heavily. The fruit is large, juicy and of exceptionally fine quality. Very hardy; good keeper.

YELLOW TRANSPARENT. (Early). The finest extra early yellow Apple. Ripens late in July and continues in season until September. Fruit good size, waxy yellow. Flesh white, mild, juicy, sweet.

WEALTHY. Ripens late summer and early autumn. Perfectly hardy, vigorous and productive. Fruit large, red streaked with white. Quality good. A profitable market sort.

SNOW APPLE. Medium size. Deep crimson; flesh white, very juicy and tender.

HYSLOP CRAB. Excellent for preserves and jellies. A heavy, regular producer. Fruit red, round, smooth; flesh yellow, sub-acid.

Yellow Delicious

BEACON *New All-Red Early Apple*

Originated in Minnesota where the temperature often reaches 40 degrees below zero. The uniform size and shape; the high color and quality, together with the keeping and handling quality, so different from most early apples, make Beacon the outstanding early Apple for home and market. Coming so early, and its superiority over other fall Apples, prolongs your picking season, as they come just before Wealthy. Get yours now—be the first. Prof. Alderman, of the Minnesota Department of Agriculture, says: "The new Beacon is a fall Apple ripening with or a few days later than Duchess, and will keep a month after harvest without cold storage facilities. It is a highly colored, all-red variety—better eating than the Duchess, and is an excellent cooking Apple. The tree is vigorous, productive, and very hardy." See illustration.

Following are the Most Valuable Winter Apples:

DOUBLE RED DELICIOUS. (Fall, winter.) This new Double Red Delicious colors about three weeks earlier than the common Delicious. In August, when the regular Delicious are still green, Double Red Delicious are red all over and are ready to bring fancy prices. Our supply is limited — order early and play safe.

JONATHAN. Late fall, winter.) Grand, good winter Apple. Bright, solid red. Flesh white, sometimes tinted with red; firm, fine, crisp and tender. A splendid family sort and highly profitable for market. Tree long-lived, productive and an early bearer. Keeps well and will stand much handling.

TURLEY'S WINESAP. (Winter.) The old Winesap did not have enough red color. Turley's Winesap is a cross between a Rome Beauty and a regular Winesap; is dark red when ready to pick. One of the firmest Apples; keeps until spring.

The Cream of the PEACH Varieties

PEACHES THAT ARE GROWN IN
THE PEACH - GROWING CENTER

HALE - HAVEN

(Early Yellow Freestone)

This wonderful new Peach was introduced by the Michigan State Experiment Station, South Haven, Michigan. It is a cross between South Haven and J. H. Hale. A large, beautifully colored, yellow-fleshed Peach ripening about two weeks before Elberta, a perfect freestone, extremely high color; colors a few days before it is ripe on the tree, therefore can be picked reasonably green for long distance shipping. Write for special prices on large quantities.

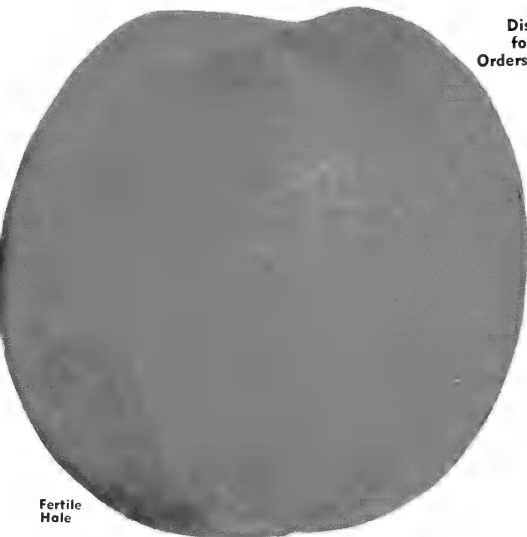

Big
Discount
for Early
Orders. See page 3.

Hale-Haven

ELBERTA

Midseason. The Standard of All Peaches

The outstanding midseason variety by which all mid-season Peaches are judged. Grown over the entire country for both commercial and garden purposes. Very large, yellow with red blush cheek, very juicy, highly flavored. Hardy, vigorous grower, does well in all peach-growing sections. Ripens fore part of September. Write for special prices on large quantities.

Fertile
Hale

FERTILE HALE

U. S. PLANT PATENT No. 175

At last we have a Peach as showy and as large in size as the J. H. Hale, which does not require interplanting in order to cross-pollinize. The trees are more vigorous and hardier in bud than the J. H. Hale; test trees of the Fertile Hale at the Michigan State Experiment Station came through with a crop when the J. H. Hale and Elberta had practically a crop failure. This again proves extreme hardiness for this remarkable variety. The Fertile Hale ripens about five days after the Elberta; color yellow with deep carmine blush; a good shipper. This variety should by all means be included in every orchard planting. This patented Peach is handled under a license Prices are net, no discount.

KAL - HAVEN

THE PERFECT HARDY NORTHERN PEACH

Originated here in Michigan by our Department of Agriculture, who made THOUSANDS of crossings to develop this fine new Peach. The large fruit is brilliant yellow with highly colored cheek, exceptionally fine flavored. Its thick skin makes it an excellent shipper. A freestone that ripens a few days before Elberta. Trees are thrifty growers. All in all its enormous size, beauty, hardiness, shipping and keeping qualities make Kal-Haven a desirable Peach for your collection. Don't fail to include it on your Peach list!

QUINCE

ORANGE. We list only this one Quince, as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size. **Prices:** 3 to 4 ft. trees, 60c each; 3 for \$1.50; 10 for \$5.00.

APRICOT

MOORPARK. Large, roundish oval, pale orange with a faint touch of red on cheek; yellow flesh; ripens first of August. **Prices:** 4 to 4½ ft. trees, 60c each; 3 for \$1.50; 10 for \$4.75.

Moorpark Apricot

PLUMS

Popular, Heavy Bearing Varieties

See cover page for price and description of the Yellow Health Tomato, "MINGOLD".

German Prune Plum

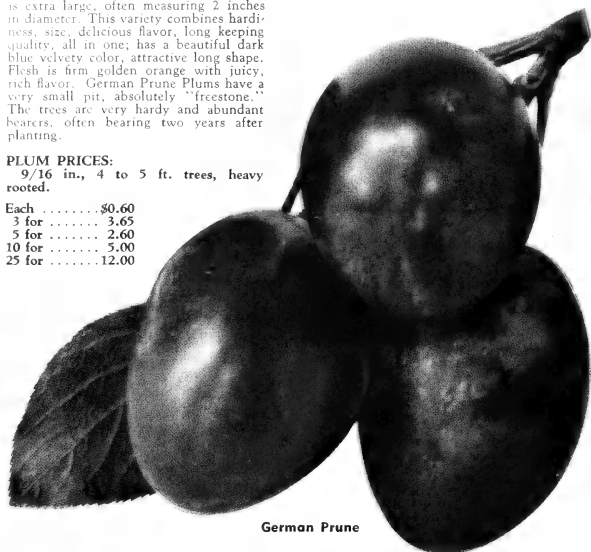

A Plum We Like to Recommend

The most delicious of all Plums; fruit is extra large, often measuring 2 inches in diameter. This variety combines hardiness, size, delicious flavor, long keeping quality, all in one; has a beautiful dark blue velvety color, attractive long shape. Flesh is firm golden orange with juicy, rich flavor. German Prune Plums have a very small pit, absolutely "freestone." The trees are very hardy and abundant bearers, often bearing two years after planting.

PLUM PRICES:

9/16 in., 4 to 5 ft. trees, heavy rooted.

Each	\$0.60
3 for	3.65
5 for	2.60
10 for	5.00
25 for	12.00

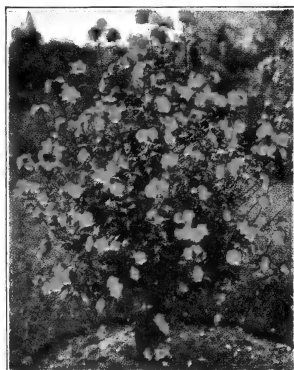

German Prune

Yellow Egg Plum

Very popular yellow Plum. Rapid grower; hardy, thrifty, prolific bearer. Fruit rich yellow, size medium to large.

Bartlett—the most popular Pear for home use and market.

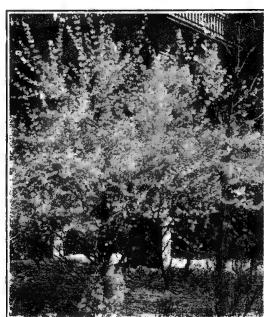

Red Althea (Rose of Sharon)

RED FRENCH LILACS

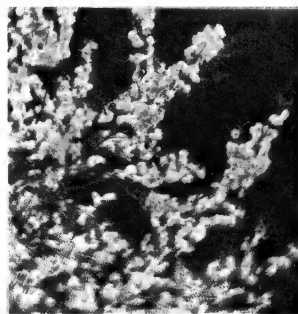

Way ahead of all other types of Lilacs. These varieties bloom very young, with mammoth panicles measuring 7 to 12 inches; clusters of gorgeous, fragrant blossoms. Budded on hardy non-suckering roots.

No waiting for flowers—they have a few blooming buds now. Sturdy, 2-yr., blooming-size, 35c each; 3 for \$1.00; 10 for \$3.00.

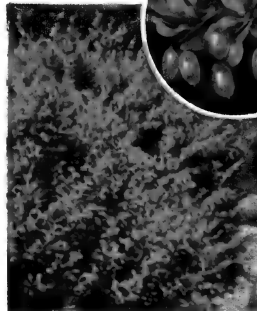

Forsythia (Golden Bell)

See descriptions, next page.

Flowering Almond

Red Barberry

PEARS

BARTLETT. The most popular Pear for home use and market; a leader among canning Pears. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with delicious, musky flavor. Tree vigorous, erect, bears abundantly. Price: 9/16 in., 4 ft. and up, 50c each; 3 for \$1.35; 10 for \$4.25; 25 for \$8.75.

KIEFFER. (Fall.) Large, handsome appearance; rich golden yellow, sometimes tinted red on the sunny side; bears largest, most consistent bumper crops. Wonderful keeper and an astonishing long distance shipper. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops. Price: 9/16 to 11/16 in., 50c each; 3 for \$1.35; 10 for \$4.25; 25 for \$8.75.

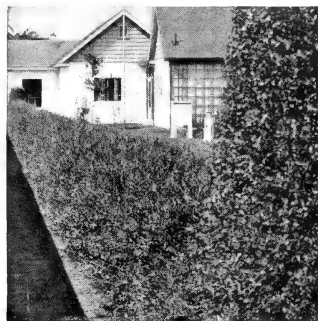

SECKEL. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October. Price: 9/16 in., 4 ft. and up, 50c each; 3 for \$1.35; 10 for \$4.25; 25 for \$8.75.

NEW! NEW! NEW! NEW!

Seedless Pear

(Patent Pending)

Endorsed by Prof. Ellenwood, Ohio Agricultural Experiment Station. Triumphs in flavor and flavor. Every bite a delight! Smooth and melting, juicy, moist and packed full of rich flavor. No seed. No core. Just solid white Pear all the way through. As large as the largest Bartlett. Waxy yellow skin with russet flecks and red cheek. It's so easy to can and serve the smooth halves or whole Pears for fine salads and desserts. You save the third usually wasted in preparing ordinary Pears. Seedless Pear is a practical, high-grade fruit for market. It ripens 10 days after Bartlett. The trees usually bear when three years old, and produce enormous crops. Price: 7/16 in., 3 to 4 ft. trees, \$1.00 each; 5 or more, 75c each. No discount.

Hedge Plants

CHINESE ELM HEDGE. The very finest of all hardy hedges, very fast grower, can be trimmed to any size or height. Plant 12 to 18 inches apart along walks, drives, lot lines, as windbreaks, or to hide undesirable views. Cut tops back to 12 inches to cause plants to branch thickly from the bottom. Grows 12 to 15 feet in height. 20 for \$1.10; 50 for \$1.75; 100 for \$2.50; 500 for \$10.00.

CALIFORNIA PRIVET. This variety has long been known as one of the most beautiful hedging plants. It grows rapidly and is free from insects and scale. Leaves are dark glossy green. Not dependably hardy in some northern sections. 18 to 24 in. strong plants, 3 for 25c; 10 for 70c; 25 for \$1.75; 100 for \$6.40.

AMOR RIVER PRIVET. The hardiest and one of the most beautiful hedges. Glossy green leaves stay on long into the winter. 18 to 24 in. strong plants, 3 for 25c; 10 for 70c; 25 for \$1.75; 100 for \$6.40.

RED BARBERRY. 2-yr., 10 to 15 in., 12 for \$1.25; 25 for \$2.35; 50 for \$4.00. See description on this page.

Westhauser's Hardy Flowering Shrubs

RED ALTHEA

(Rose of Sharon)

Beautiful treelike shrub, blooming late in August and September with a profusion of large and brightly colored flowers. Grows 10 to 12 feet high. Attractively used for specimen or hedge. 2-yr., 2 1/2 to 3 ft. strong, full blooming-size bushes, 35c each; 3 for \$1.00.

HYDRANGEA A. G.

(Hills of Snow)

Large, flat clusters of white blooms from June to September. Hardest of Hydrangeas. Excellent for solid low borders or in foundation plantings. 1 1/2-2 ft. blooming-size, 29c each; 3 for 75c.

HYDRANGEA P. G.

Giant heads of creamy white flowers, 6 to 9 inches long, turn to rose in autumn. Can be dried for winter bouquets. Fine for foundations, borders, groups. 1 1/2-2 ft. blooming-size, 25c each; 3 for 70c; 10 for \$2.00.

WEIGELA ROSEA

Sprays of large pink flowers. Leaves beautifully variegated green and white. Grows 3 to 4 feet high. 2-yr. strong, blooming-size, 15 to 18 in., 30c each; 3 for 75c; 6 for \$1.25.

SPIREA VAN HOUTTEI

(Bridal Wreath)

Long, graceful, drooping sprays covered with a mass of white flowers blooming in early spring. Very hardy, used in all sorts of landscape work. Grows to a height of 6 feet. 18 to 24 in., 20c each; 3 for 40c; 15 for \$1.00; 25 for \$1.50; 100 for \$9.25. 2 to 3 ft., 30c each; 3 for 75c; 15 for \$1.50; 25 for \$2.25.

HONEYSUCKLE HECKROTTI

Everblooming Wonder Vine

New, everblooming wonder plant of the century. Blooms continuously, beautiful red flowers throughout the summer. Very highly scented. Wonderful foliage. Include several of these vines in your order, as they will give you everlasting joy. 2-yr., extra large blooming-size, will produce hundreds of blooms this year, 50c each; 3 for \$1.00; 6 for \$1.75.

NEW PURPLE BUDDLEIA

Rich purple spikes a foot or more tall. This variety surpasses all other Buddleias for brilliance of color, grace of flower spikes, and uniform habit of growth. Blooms August to late fall. Extra heavy, 3-yr., 3 to 4 ft. plants, 50c each; 3 for \$1.25. 2-yr., 20 to 24 in., 35c each; 3 for \$1.00.

FLOWERING ALMOND

(Pink)

Early spring-flowering shrub, in full bloom before the leaves appear. Growth dwarf and bushy, compact with slender branches. Very good used in grouping or for lawn. The multitudes of tiny rose-shape flowers are in wreath form. 1 1/2 to 2 ft. blooming size. 35c each; 3 for \$1.00.

FORSYTHIA

(Golden Bell)

Earliest blooming. Golden, bell-shaped flowers. Blooms often before the snow is gone. Tall grower. 2-yr., 2-2 1/2 ft. strong, full blooming-size shrubs, 25c each; 3 for 70c.

RED BARBERRY

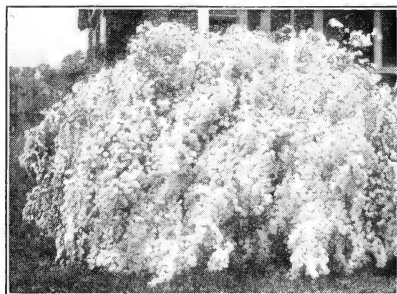

No other shrub can compare with the striking brilliance of our double-red strain of Barberry. Its abundance of thick, purplish red leaves glisten in the sun, contrasting luxuriously with the green and yellow of other plants. Bushes have low-growing habit. Can be pruned any time in summer to desired height and width. Lovely for borders, hedges, foundations, groups and lawn specimens. Red berries in winter. Set plants 1 1/2 feet apart, in full sunlight. 2-yr., 15 to 20 in., 3 for 75c; 6 for \$1.35; 12 for \$2.50. 3-yr., 20 to 24 in., 50c each; 3 for \$1.40; 6 for \$2.50; 12 for \$4.50.

Spirea Van Houttei

Westhauser's Heavy Rooted GRAPE VINES at Wholesale Prices

Concord (Blue)

Concord is without doubt the most productive, the most popular and profitable variety yet introduced. It is the standard of excellence, quality and comparison on all markets, and buyers everywhere pay a premium for this superior quality Grape. Concord is perfectly hardy, having withstood a temperature of 30 degrees below zero without injury; it will produce more fruit per acre than any other variety and does well on light or heavy soil. The bunches are large and compact, berries large, bluish black color; sweet and juicy; fine quality and flavor. In fact, this variety is the one all-purpose Grape.

Niagara (White)

The leading commercial white Grape. More productive than other standard white varieties. The quality of Niagara compares with Concord. In great demand as a table and wine Grape.

Moore's Early (Black)

Earliest good sweet black Grape grown. Berries are large, jet black. A splendid Grape for table use. Does not winter-kill and needs no special protection.

New Hardy SEEDLESS CONCORD GRAPE

After years of experimentation and cross-breeding, a perfectly hardy, seedless Grape has been developed. The first of a new race of Grapes that should eventually replace the common large-seeded varieties for table use. It is of the Concord type, but slightly smaller, blue-black in color, and possesses the same fine flavor found in the Concord Grape.

FANCY GRAPES

For Highest Flavor and Quality

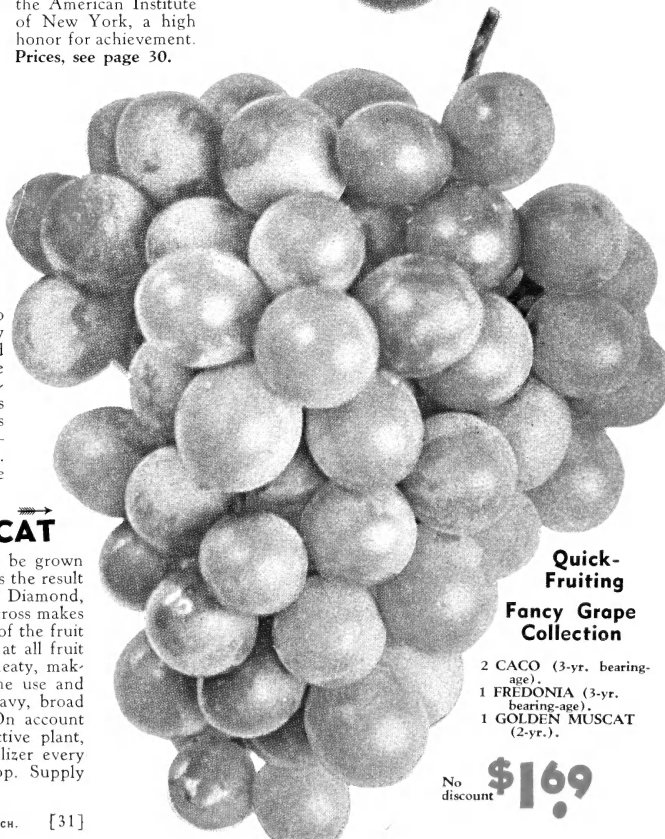

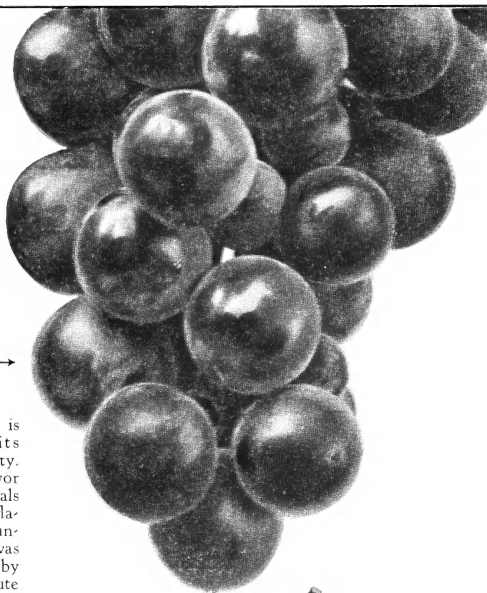

FREDONIA

A winner. This new variety threatens to displace all other black grapes. A new, very early grape, originated and thoroughly tested by the New York Experiment Station. The clusters and berries are large with excellent flavor. Ripens fully ten days before Moore's Early and is an excellent shipper, as it does not crack. This grape fills a long-felt need—a juicy, delicious black grape that ripens early. Vine vigorous and productive. One of the best new varieties. Prices, see page 30.

CACO
(Red)

This new Grape is outstanding for its beauty and quality. Color wine-red, flavor unusually rich, rivals in appearance and flavor Grapes grown under glass. Caco was awarded a medal by the American Institute of New York, a high honor for achievement. Prices, see page 30.

GOLDEN MUSCAT

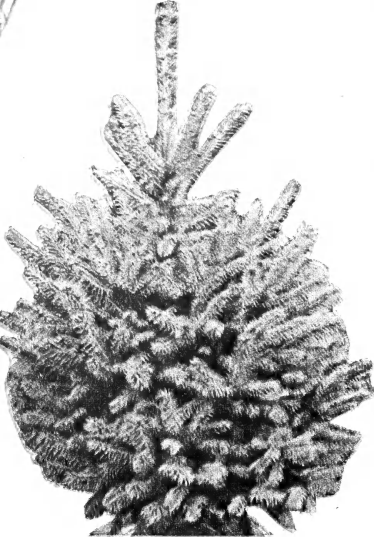

This new hardy California Grape can now be grown in every section of the country. This variety is the result of the cross of the Muscat Hamburg and Diamond, which are very desirable in themselves. This cross makes a hardy, heavy bearing vine, and the quality of the fruit is similar to the white California Grape sold at all fruit markets. The berries are large, sweet and meaty, making it a wonderful variety to grow for home use and roadside stands. The bunches are large, heavy, broad shouldered, and tapering. Very compact. On account of this Golden Muscat being such a productive plant, we advise a good complete commercial fertilizer every spring, and you will be delighted with the crop. Supply of plants still limited. Prices, see page 30.
